

IN THE CLAIMS:

Please amend the claims as follows:

1. *(currently amended)* A lighting system comprising:
 - a separate carrier for a primary source of electricity, the carrier including a plurality of primary coils;
 - a plurality of sealed lighting modules, each including
 - at least one secondary coil,—each arranged for ~~electro-magnetically~~ electromagnetic linking with induction from one of the primary coils;
 - at least one light source; and
 - at least one back-up battery; wherein
 - said lighting module is arranged to seal the secondary coil, the at least one light source and the at least one back-up battery therein.
 - ~~charging circuitry for the battery; and~~
 - ~~change-over circuitry to change to battery power in the event of failure of the primary electricity source.~~
2. *(original)* A lighting system as claimed in claim 1, wherein each lighting module further includes rectification means.
3. *(currently amended)* A lighting system as claimed in claim 1, wherein the at least one light source is at least one LED.
4. *(previously presented)* A lighting system as claimed in claim 1, wherein the light sources form shapes.
5. *(currently amended)* A lighting system as claimed in claim 4 wherein the light ~~sourcee~~ sources form shapes and are made of points of light.

6. *(previously presented)* A lighting system as claimed in claim 4, wherein the shapes are directional arrows.

7. *(canceled)*

8. *(previously presented)* A lighting system as claimed in claim 4, wherein the shapes are words.

9. *(canceled)*

10. *(currently amended)* A sealed lighting module for use with a carrier ~~[[for]]~~ of a primary source of electricity, and the separate carrier having a plurality of primary coils, the sealed lighting module comprising~~[[;]]~~ :

- at least one secondary coil for electromagnetic induction ~~[[form]]~~ from a primary coil of the separate carrier;
- at least one light source; and
- at least one back-up battery; wherein
- said lighting module is arranged to seal the secondary coil, the at least one light source and the at least one back-up battery therein.
- ~~charging circuitry for the battery; and~~
- ~~change-over circuitry to change to battery power in the event of failure of the primary electricity source.~~

11. *(previously presented)* A sealed lighting unit as claimed in claim 10, wherein each lighting module further includes rectification means.

12. *(currently amended)* A sealed lighting unit as claimed in claim 10, wherein the at least one light source is at least one LED.

13. *(currently amended)* A sealed lighting unit as claimed in claim 10, wherein the at least one light sources form shapes.

14. *(currently amended)* A sealed lighting unit as claimed in claim 13, wherein the light sources ~~form shapes and~~ are made of points of light.

15. *(previously presented)* A sealed lighting unit as claimed in claim 13, wherein the shapes are directional arrows.

16. *(canceled)*

17. *(canceled)*

18. *(canceled)*

19. *(new)* A lighting system as claimed in claim 1, wherein each lighting module further includes charging circuitry for charging the battery.

20. *(new)* A lighting system as claimed in claim 1, wherein each lighting module further includes change over circuitry for change to battery power in the event of a mains failure.

21. *(new)* A sealed lighting module as claimed in claim 10, wherein each lighting module further includes charging circuitry for charging the battery.

22. *(new)* A sealed lighting module as claimed in claim 10, wherein each lighting module further includes charging circuitry for changing the battery.
